

Biodiversity - The Web of Life

Vital for Good Health

HUMANS ARE ACCELERATING BIODIVERSITY LOSS BY:

overconsuming resources

accelerating climate change

introducing weeds and feral animals

overhunting and harvesting species

clearing native vegetation

polluting land and water

overpopulating

Australian State of the Environment 2006 Report

"Australia's biodiversity is of incalculable value to this and future generations. major pressures will continue to drive decline in biodiversity across large areas of the continent."

Will the next generation inherit a healthy

EARTH ?

If every person now living consumed resources like the average Australian, we would need 4 earths to support that lifestyle. Reduce your 'Ecological Footprint' by following your doctor's prescription...

Your Doctor's Prescription For A Healthier Planet

1. REDUCE WASTEFUL CONSUMPTION
2. LEAVE THE CAR AT HOME
3. BE WATERWISE
4. BUY PRODUCTS WITH LOWER ENVIRONMENTAL IMPACT
5. REDUCE LANDCLEARING AND SUPPORT REVEGETATION

Take daily
