

LET'S PRETEND - NO LIMITS TO GROWTH!

STOP KIDDING YOURSELF

Humans are consuming natural resources 1.4 times faster than they can be renewed.

Excessive consumption damages health through obesity, chronic disease, cancer, inequality and conflict. A sustainable economy is not compatible with unlimited growth.

Prescription for a healthy future.

- ✓ Refuse – consumerism
- ✓ Reduce – consumption
- ✓ Re-use – and repair
- ✓ Recycle – and compost
- ✓ Re-discover – sustainability
